NOTE:

The term Zespri GAP & GRASP is not new and is used in various places throughout the new Grower Manual and this section of the Quality Manual. Zespri GAP & GRASP is not a standard on its own but a combination of the various standards our growers have to meet, this includes GLOBALG.A.P. & GRASP requirements, The Food Act 2014, the Biosecurity Act and there is currently one Zespri requirement setting a standard for shelter belts. On occasions, there can also be data gathering questions within the Zespri GAP & GRASP checklist such as for the Zespri Sustainability Team with regards to water use, these are non scoring and do not have any influence on the growers being compliant.
