## Standards we followed

We conducted our limited assurance engagement in accordance with International Standard on Assurance Engagements (New Zealand) 3000 (Revised) *Assurance Engagements other than audits or reviews of historical financial information*. For Greenhouse Gas Emissions, we also conducted our engagement in accordance with International Standard on Assurance Engagements (New Zealand) 3410 *Assurance Engagements on Greenhouse Gas Statements*. We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion. In accordance with those standards we have:

- Used our professional judgement to plan and perform the engagement to obtain limited assurance that the subject matters are free from material misstatement, whether due to fraud or error;
  - Considered relevant internal controls when designing our assurance procedures, however we do not express a conclusion on the effectiveness of these controls; and
  - Ensured that the engagement team possess the appropriate knowledge, skills and professional competencies.
- The procedures performed in a limited assurance engagement vary in nature and timing from and are less in extent than for a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.
